

PHYSIOTHERAPY CLINIC

PADINHATTUMMURI, PO, MALAPPURAM

Ph: 9567448822

Ref:

Date: 25/10/21....

"COEXIN" concentration & Co-ordination ~~Exercise~~ Exercise tool was very Effective for Patient with attention & concentration Problem such as stroke, Retard & other condition.

→ we gave Patient using for this by this machines about 20-30 minute per day. through this Patient actively participate and full attention given for this activity. As this is a biofeedback machines Patient know what the Error made by them. and they actively try to correct in next Round.

→ This is a challenging activity so their brain thinking Power, ability to concentrate and activity skill improve.
